I handle both halves of an online presence: the website that gets built, and the marketing that gets it found. Most businesses buy those separately and pay for it later, because a site built without search in mind is expensive to fix, and ads pointed at a slow page waste budget.

SELECTED WORK

Zedutoys

E-COMMERCE, BRANDING, WEB

Brand identity and store design for an educational toys retailer. Built a collections system (MindSprout, MakeSprout, ZingPlay) and age-based browsing, so parents shop by what a toy develops rather than by product type.
